DETAILED ACTION

Amendment

1. Receipt is acknowledged of the after-final amendment filed 9 December 2004.

Examiner's Comment

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on 18 April 2001 and 14 April 2003 are informal (i.e. they are hand-drawn). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-3, 9-12, 21-24, 26-35, and 39-47 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The best prior art of record in the form of Christy and Arnold fails to teach the use of two different sensors (i.e. a thermal sensor and a sensor different from a thermal sensor, such as a sensor from the group of x-ray, capacitance, and magnetic sensors) in order to be able to identify a multiple layer label that has marking layers that each comprise a different medium. Hence the best prior art of record fails to teach the invention as set forth in claims 1-3, 9-12, 21-24, 26-35, and 39-47 and the examiner can find no teaching of the specific machine readable multiple layer label system, nor reasons within the cited prior art or on her own to combine the elements of these

references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 9 December 2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
